Current Serials List

Introduction

This issue of the GSC Library's Current Serials List represents the initial attempt to provide quick access to the Geological Survey of Canada's extensive and highly specialized collection of material on geological and related sciences.

Although the list contains over 4,000 entries, it is by no means exhaustive, representing roughly one-half of the serial titles held in the GSC Library. Map series and other special collection titles have not been included. Titles are continually added to the list and will appear in future issues.

Périodiques en cours

Introduction

Ce numéro de Périodiques en cours est une première ébauche qui vise à fournir un accès rapide à la vaste collection d'ouvrages spécialisés en géologie et sciences connexes retenus dans la bibliothèque de la Commission géologique du Canada.

Les plus de 4 000 notices contenues dans le répertoire représentent seulement la moitié des publications en série retenues à la bibliothèque. Les cartes en série et autres collections spéciales ne sont pas encore inscrites. De nouveaux titres seront continuellement ajoutés et apparaîtront dans les numéros suivants.
